DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all

obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Faas

(2,275,012) in view of Lee et al (5,749,278), hereafter Lee. Faas discloses main body 1, 2, 3, 4, 5, 6, 7, 8, 10, 11, 12, 13, 14, 15, 16, 17; sustaining structure/roller 27; non-linear levering rod 20, 19; force-receiving portion 19; pivot portion 25; depressing-force exerting portion 22; stack of sheets on page 1, lines 1-6. Faas discloses everything as noted above, but does not disclose a bent portion. However, Lee teaches bent portion 30. It would have been obvious to provide a bent portion in Faas as taught by Faas in order to make the apparatus more compact for easy storage. Note the bent portion in Lee keeps the force-receiving portion at a substantially horizontal level. Also note, the bent portion in Lee has an angle from 145 degrees to 160 degrees in figure 4. The roller 27 is considered coupled to the non-linear levering rod 19,20 due to the contact with the depressing-force exerting portion 22.
